

Lab Task 6 Using Display Property (Block Level, Inline-Block and Inline)

Instructions:

1. Create a file named LabTask6-1.html
2. Using Internal CSS create and design the ff: using div as your container tag and appropriate html elements.
3. Follow the required property settings as indicated

Create 2 text boxes and put them on separate lines (using `display: block`)

Create a paragraph and 2 buttons and place them on the same line (using `width`, `display: inline-block` and `vertical-align: middle`)

Thanks for chatting with our customer support. Would you like to take our quick survey?

Download Google's logo and create the google.com search form

We created the text box in exercise 7e.
For now, position the logo with margin (we'll learn better ways to do this later)

Challenge Exercises
